News Notes

W. Meldrum's new residence is
now completed. This ranks as one
of the finest houses in Raymond.

Paul Dahl is building a modern
8 room residence east of Broadway.
S. Ellis has the contract.

Seattle and Tacoma newspapers
have been devoting front page
space to the shooting of an alleged
moonshiner, Emil Matsumoto, near
Orting, Wash. some weeks ago.
Those held for the shooting are
Rev. Dr. George A. Seeley and
three federal prohibition officers,
one of whom is Mark Y. Croxall.
Unconfirmed rumor has it that
the Croxall mentioned is Mark Y.
Croxall, one-time mayor of Ray-
mond.

The folks who keep on sawing
wood in all kinds of weather are the
folks who have the biggest wood-
pile at the end of the season.

A man went into Cohen's book-
store and asked: "Have you a copy
of 'Who's Who and What's What',
by James K. Jerome?"

Cohen replied: "No, sir but we
got 'Who's He? and What's He Got?'
by Bradstreet."

The origin of the word "teller" is
this: Formerly the cashier took in
and paid out the bank funds. Then
came the first woman to make a
deposit. The cashier endeavored
to explain to her the method of
using a check. At last, exhausted
he called to one of his assistants,
saying: "You tell 'er; I'm all in."
The assistant succeeded and the
position of teller was created for
him on the spot.

News Notes

According to present plans the
sugar factory will open next Thurs-
day. Mr. Wing, superintendent,
announced that assignments of
factory workers will be made next
Monday at 2 p. m. It is expected
that a far heavier tonnage of beets
will be chopped this year than was
handled last season. C. G. 10.

The local business section was
dragged over the coals this week
by Provincial Health Inspector
Williams. He ordered several al-
terations in certain restaurants
and gave further instructions re-
garding cess-pools. If these are
not carried out prosecutions are
threatened.

The health by-law is published
on the back page of this issue. Ev-
ery citizen should read it and be-
come familiar with its require-
ments.

The world's baseball series this
year will open on October 2nd in
the city of the American League
pennant winners. It was decided by
Baseball Commissioner K. M. Lan-
dis and representatives of the lead-
ing teams in the American and
National League. The second
game will be played in the city of
the American League winners.

Lee Brewerton, manager of the
Rex Theatre, was called to Leth-
bridge last Monday regarding the
Dempsey-Tunney fight pictures.
It will be of interest to local
theatre goers and sport enthusiasts
to know that Raymond will be
the first town in Southern Alberta
to show these pictures. They will
be screened at the Rex Theatre im-
mediately following the Calgary
showing. Kindly watch for dates.

New Telephone Rates Are Necessary

BECAUSE

The old rates failed to provide any reserve
provision for depreciation or storm damage
on an investment by the people of the Prov-
ince of \$22,956,148.57.

The old rates barely paid for operating
expenses and interest charges on the cap-
ital debt.

The interest charges of over a million and
a quarter annually are fixed and must be
paid.

Operating expenses have been cut by
\$10.03 per station in the last few years and
can be cut no further without seriously
impairing the service.

The added revenues will secure adequate
protection of the investment and put the
telephone utility on a sound financial basis.

The individual subscriber's share of the
increase is small and he receives dollar for
dollar of his rental in good telephone service.

With adequate and fair rates, Alberta's
Telephone System is second to none in Am-
erica. As a subscriber you appreciate this.

People who want the very best
use Red Rose Orange Pekoe Tea.

Full Steam Ahead

Within a few days of the writing of this article the electors of Canada will journey to the polls in order to select their representatives in a new House of Commons and thereby also determine the political complexion of the Government. Before this article appears in print the verdict of the ballots will have been rendered.

Whatever that verdict may be, and at the time of writing it is very decidedly in doubt, it is to be hoped that it will be sufficiently decisive one way or the other to give the successful party a fair working majority in the next Parliament. It is in the interests of Canada that stable government be re-established and unquestionably the great majority of the people wish it.

Economic conditions throughout the Dominion are very satisfactory at the present time, business is good and promises to be better, industry in all its branches is active, trade is rapidly expanding, and increased prosperity is everywhere apparent. What Canada now requires is not only maintenance but to further advance these conditions, is a removal of the era of doubt and indecision in government which has existed as a result of the stalemate in Parliament.

A young country like Canada can ill afford to "dilly-dally" at any time, but at no time is such a policy, or rather lack of policy, quite so dangerous as during those periods when decision and vigorous aggressive action are necessary to take full advantage of the flowing tide.

Quite apart from all partisan considerations, or whether Mackenzie King or Arthur Meighen head the Government, there are certain policies which the present and future welfare of Canada demand should be adhered to and further developed. They may well constitute fundamental planks in the programme of all Canadian Governments, and it is to be earnestly hoped that a Government will be placed in office sufficiently strong to carry them out. Failing the creation of such a Government, both parties might well unite to give effect to them.

In the first place, the policy which has been developed during the past few years, and for which Hon. Mr. Robt. Robt. deserves great credit, of negotiating trade arrangements with various countries should be persevered in. The present activity in Canada's manufacturing industries is the direct outcome of this policy which has resulted in opening doors and creating wider markets abroad for Canadian goods. It is not a protective tariff designed to shut foreign-made goods out of Canada that has brought present prosperity to manufacturers and the labor they employ, but the development of an export trade far exceeding anything hitherto known, and building up a favorable balance of trade mounting up into the hundreds of millions of dollars. Last year, for the first time in Canada's history, more manufactured goods were exported from Canada than were imported. This record should be maintained, and the favorable margin steadily increased. It can be done through the development of foreign markets, and the making of mutually advantageous trade agreements whereby such markets will be opened to Canada.

Secondly, unremitting attention should be devoted to the question of immigration. Close and expert study of every angle of this large subject should continue without any interruption, and necessary legislation passed, appropriations made, and efficient administration as free as possible of red tape provided, all to the end that an ever increasing stream of settlers may be located here to till the fertile agricultural lands and develop the many other resources of natural wealth of which the Dominion can boast. There is no room for, and no reason for, party politics in dealing with this essentially great nation-building programme.

While Canada must continue to raise a large revenue for the Federal Government in order to meet and discharge our war obligations, further reductions in taxation should be made so as to relieve the individual taxpayer and release money for profitable and productive investment. The increased buying power of the people following tax reductions, the added momentum given to business and in all lines of industrial activity, resulting in increased employment, will, in the final analysis, so speed up the business of the whole that the Government will receive quite as large a revenue in the aggregate although each individual contribution will be smaller.

There are other matters calling for attention and definite action, but these three outstanding subjects of national importance should not be neglected no matter what the complexion of the next Parliament and Government may be. Furthermore, the Government should be called upon to carry these policies into early effect. Lastly, the Government, whether under Mr. King or Mr. Meighen, should be accorded support by the people as a whole in a united endeavor to give stability in government, sound administration, and vigorous action along broad lines of Canadian advancement.

Made First Aeroplane

Flight Across Channel

Frenchman Makes Trip Again This Time As Passenger

Louis Bleriot, who, in July, 1909, made the first air flight across the English Channel in a little 25-horsepower monoplane, has crossed the channel again by air, but this time as a passenger in a 120-horsepower aircraft. It was his first flight across the channel since his historic one of 1909.

M. Bleriot has flown in France frequently since his eventful achievement of 1909, but has always travelled by steamship hitherto in his frequent trips to England.

When the proverbial rainy day comes lots of men use borrowed umbrellas.

Mice and conclusions are not synonymous, yet women jump at both.

W. N. E. 1616

Discovered High Explosive

Lloyd George Says Few Helped Britain

In Great War

Former Premier David Lloyd George, at the summer school of the Inter-Jewish Federation at Baugor, revealed that Dr. Chaim Weizmann, Zionist leader, helped to save the nation during the war by his discovery of an essential ingredient of high explosives.

"When I asked what honor I could recommend him for he replied: 'I want no honor, but I would like you to do something for my people,'" Lloyd George said.

Lloyd George paid a tribute to Jewish war service, saying that no class responded more readily to the call than the Jewish people in every country. He declared the Jews are true to the country in which they dwell and that it was a great mistake to imagine that a race which was international could not be national too.

Want the Right Kind

According to the Bishop of London there are a million and a half of the right sort of people in the Old Country who are ready to come to Canada as soon as assured of a welcome. And, no doubt, Canada will furnish the welcome as soon as it is assured that they are the right kind of people. —Woodstock Sentinel-Review.

A dead man is of as much use to the world as a lazy one—and he takes up less room.

A Ruby Of Great Value

Human Image Is Seen In Jewel Found In India

Real rubies, sparkling like drops of pigeon's blood, are beautiful jewels. But when one discloses, inside, a portrait made not by human hands, but by nature, it is unique and of surpassing value. Such a ruby has been found by a member of the Bengal legislative council. The natives consider it a gift of God, and the jewel assumes an importance that cannot be estimated in terms of cash.

The stone is not large, but inside the outer surface, deep down behind a scarlet cloud, appears a tiny image of a man, dressed in white, with a darkish brown face and deep brown eyes. The man is seen wearing a white puggree (part of the national dress of the Hindus) and the rest of his body is covered by deep folds of a garment of silken white.

The more closely the gem is examined the more the image comes out in detail. The ruby was sent to the director of the geological department in India, who pronounced it a real ruby of high value. He could not explain the portrait and so called it a freak of nature without a parallel.

For Aches, Pains,

The Safe Home Remedy

NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Croup, Colds, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

New Ray Discovered

Unlike X-ray It Can Penetrate Layer Of Lead

A description of the newly-discovered Millikan rays will be included in the next Smithsonian annual report on the compilation of which the institution is now engaged. These rays are invisible, but, like X-rays, can penetrate metal. A thin sheet of lead, however, will stop X-rays. Millikan's rays will travel through a layer of lead six feet thick.

"It seems," says a bulletin of the Smithsonian Institute, "that all space is alive with these new rays. They do not originate on the earth, but come into us with the velocity of light from the great universe beyond the atmosphere. Probably they are formed by the breaking up of the atoms which compose the stars. No one can yet foresee by what remarkable uses they may come to serve us."

"When Faraday, in 1831, demonstrated before the Royal Society that all that was necessary to obtain an electric current was to move a wire across the pole of a magnet, a woman in the audience asked him of what use the experiment was. That discovery, as we know, formed the basis of all the modern electrical machinery. Faraday replied:

"Madam, will you tell me of what use is a new-born babe?"

"Faraday's babe has grown up into a giant now. So it may prove with Millikan's."

Breaks French Typing Record

The French record for rapid typing has been broken by Mlle. Plan, a typist employed by the League of Nations at Geneva. Her speed was 94 words a minute, striking the keys at the rate of 10 times a second for one hour. The old record was 91 words.

A saddle worth \$5,000 is owned by E. S. Garcia, Elko, Nev. About \$4,000 worth of gold and silver is worked into it.

The Poisons We Love

Every healthy man, woman and child looks forward to the pleasure of appetizing breakfasts, tasty luncheons and abundantly provided dinners without giving a thought to the time when such table delights will, for them, no longer hold attraction. If the reader will recall the many popular gourmands with whom he was acquainted, who no longer continue to meet him at the festive board, he cannot fail to be struck by the fact that almost every one of such friends were fatally stricken when they should have been in the prime of their lives. And if the actual cause of their disease be investigated, the fact that the cancer scourge laid them low should give the reader food for candidly personal self-examination.

The refined foods, rich sauces, meats, denatured vegetables and fruits, white sugar and white flour from all of which the last trace of health-giving potassium and other salts have been deliberately or thoughtlessly extracted, unite in creating more acids in the body than any human liver can either neutralize or dispose of economically. The consequent state of acidosis is the precursor of the now practically universal complaint of constipation and, as Dr. Robert Bell, the eminent English authority, published to the world: "Constipation is the forerunner of Cancer."

The reason why cancer strikes civilized rich and poor in an impartial way is because civilization generally is suffering from an unrecognized potassium starvation. This peculiar form of starvation is essential to the establishment of cancer in the human body and, as the late Dr. P. W. Forbes Ross stated in 1912, if the potassium deficiency he remedied, cancer, even in advanced stages, will retrograde. Upon the profound experience and knowledge of the last quoted English authority has been built the unique success of "The Cancer-Killing Treatment for Cancer and other diseases arising from similar cause." A book explaining this treatment of the deadly self-inflicted blood disease of cancer will be mailed to all interested in fighting the scourge if application is made to Charles Walter, 51 Brunswick Avenue, Toronto, 4, Ontario, Canada. Sole Canadian and American representative for The Cancer-Killing Co., of England.

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach is Weak and Needs Toning Up

Are you one of the many sufferers who dread meal time? Hungry, and yet afraid to eat, because of the pains and discomforts that follow. When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery it becomes increasingly difficult to correct the digestive disorder. There is no tonic for the stomach that is not a tonic for the whole body; thus a blood-building tonic such as Dr. Williams' Pink Pills, not only relieves indigestion, but adds to the general strength. Mr. D. J. Shaw, Selkirk, Ont., P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

Says U. S. Cannot Claim Largest Plane

Is Greatly Exceeded By British Bomber Declare Manufacturers

Reports from the United States that the new bombing aeroplane Cyclops, christened near Philadelphia as the largest machine of the kind in the world aroused British aeroplane manufacturers, who maintain that the claim is incorrect. It is announced at London that a new British plane, also a bomber, which has just passed its test, far exceeds the United States machine in many details.

The British aeroplane carries not only a load of bombs, but also a torpedo weighing more than a ton. Its engines have developed 1,400 horsepower against 835 of the United States machine. It is claimed. The machine is built of steel tubing and the whole plane weighs some ten tons.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

It seems awfully hard for some people to be both good and interesting.

Minard's Liniment relieves stiffness

Believes Leprosy Is Curable

Optimistic About New Treatment

Dr. Robert G. Cochrane, who is not yet 30, has just returned to England after a 40,000 miles tour of the world's principal leprosy stations.

In his capacity as medical secretary to the Mission for Lepers, he has recently visited every centre in Burma, India, Siam, Honkoo and the Philippines.

For four months Dr. Cochrane lived among lepers at one of the stations, spending his time attending to them and investigating their cases. He is very optimistic about future work.

"If you can get them early on in their trouble," he said, "many patients can be treated as outpatients. In all these early cases there is a great deal of hope. Medical advancement in treatment of the disease has been considerable in the past six years. It is necessary to recognize the disease early, then with efficient treatment and the segregation of old cases, the scourge will be got under control."

Once victims realize that with early treatment the disease can be arrested there will be no difficulty in getting them to come forward to the stations. By the end of this century leprosy should, with the help of right measures, be considerably reduced."

A Lonely Queen

Jugoslavs' Queen Is Called Timid and Melancholy

Queen Marie of Yugoslavia, daughter of Queen Marie of Rumania, and youngest reigning woman sovereign in the world, is a timid and melancholy young woman. At the age of 25 she finds herself the ruler of 16,000,000 persons, but separated from them by her ignorance of the language. From the time she was 16 her mother trained her in all modern queenly duties, but she could not teach her to overcome the characteristics which now appear to make her lonely and isolated.

Twenty Lynchings in U. S. This Year

Twenty lynchings have occurred in the United States so far this year, according to the National Association for the Advancement of Colored People. Two of the victims were white.

A train of sixty-five freight cars will be required to transport the bedding for the world's largest hotel, now building in Chicago.

Bayer

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago

Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetide-acid of Salicylic Acid, "A. S. A." While it is well known that Aspirin is a Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Canadian Grown Seeds Enjoy A High Reputation Under The Canadian Standardization System

"Northern grown" seeds are much discussed by farmers and gardeners who do not live in the north. The term has come to imply unimpaired vigor, early maturity and productiveness. Canadian grown seeds enjoy a high reputation because of these qualities and because there has been established in Canada a system for standardizing seeds under grade names designated in the Seeds Act. The inspectors of the seed branch of the department of agriculture inspect seed crops for purity of variety at a cost of fifteen cents per acre to the farmer. The threshed and cleaned seed is again inspected by the same officers, and if of superior quality is graded, registered, and sealed in the sack for commerce.

The quantity of registered, extra No. 1, and No. 1 grades of inspected seed grain produced in Canada is much in excess of domestic requirements, and large amounts of seed oats, barley, wheat and rye are offered for export under seed inspection certificates. Because of having so large a quantity available in the domestic market the cereal crops in Canada during the past fifteen years have become greatly improved, with fewer varieties and the general use of seed that is true to a desirable variety.

Alfalfa grass grown in Canada controls the world's prices for that commodity. The rich, moist, clay loam soils in Canada produce alfalfa seed of a quality unequalled by any other place in the world. The world's greatest centre of alfalfa seed production is probably Victoria county in the province of Ontario.

Under the seed branch service of field crop and seed inspection, alfalfa seed production has increased in twenty-five years from nothing to more than one hundred thousand bushels. Exports from last year's alfalfa seed crop amounted to approximately seventy-five thousand bushels. The Ontario Variegated and the Alberta Uniform varieties of alfalfa seed are sought after in many countries because of their proven winter hardiness and superior quality for forage crop purposes.

Grass seed production includes many kinds: Timothy, western ryegrass, Italian ryegrass, and in recent years, the finest of turf grass, brown-top. Twenty-five thousand pounds of seed of this latter grass was produced last year on Prince Edward Island from inspected seed crops, and it is anticipated that this autumn may be increased this year to sixty thousand pounds. Seed of No. 1 grade will yield approximately a dollar per pound. The No. 3 grade and other inferior qualities equal or superior to the imported stocks of the same species will be sold in competition with them at prices commensurate with the quality.

From the brome grass seed crop five hundred thousand pounds were harvested and sealed in the sack for export at a cost for seed testing and sealing of one-fifth of a cent per pound. Trading on the basis of an inspection certificate, as distinguished from a type sample certificate, would seem to be highly satisfactory to seed merchants.

Thus for the greater part of Canadian requirements of field root and garden vegetable seeds have been imported. Fifteen years ago a start was made by the seed branch to encourage the home production of these seeds. The work so undertaken was attended with success but was disrupted during the war. About thirty-five farmers and gardeners who have made a specialty of growing seed of one or more kinds of these crops have continued throughout, and during the last few years these have steadily increased in number. The province of British Columbia offers numerous local climates, and under ideal soil and moisture conditions the best quality of field root and garden seeds in the world may be economically produced in quantity for commerce.

The development of this industry will necessarily continue to be slow because it requires many years of special training on the part of the seed grower. Horticultural plant breeders at the various experimental stations in Canada have undertaken to provide elite stock seed specially bred and selected to fit into Canadian climatic conditions. It is to the multiplication of this stock seed that the growers in British Columbia and other parts of Canada will devote their attention. The steady development of this special industry is reasonably assured because the quality of the seed produced exceeds that of any other seed, and is particularly suitable for Canadian use.

Discoveries By Plant Wizards

Important Results Obtained By Experiments in Plant Breeding
Since Dr. Charles Saunders originated Marquis wheat, which for 15 years has won the world's wheat prize at the International Show at Chicago, and is the most popular spring wheat among American-Canadian farmers, several other important discoveries in agriculture and horticulture have been made by the plant wizards or practical scientists at the 27 Canadian Government experimental farms. The discovery of Marquis wheat, which is regarded as one of the most notable in agriculture, was made at the Central Farm at Ottawa.

It was at the same farm that L. P. Newman, Canadian Government cerealist, originated Garnet wheat, a variety of spring wheat that matures from seven to ten days earlier than Marquis, stands dry weather and excessive moisture better, is more immune from the danger of rust than any other wheat and because of its earlier ripening advantages will extend the wheat growing area of Canada 100 miles further northward and open up for wheat growing an area of over 10,000,000 acres.

Important work in plant breeding, in fruits, vegetables and flowers is now being carried on. In recent years 200 varieties of apples have been originated at these experimental farms. Most of the old varieties grown in North America originated in Britain or Europe, but many were proved unsatisfactory in the colder provinces; and in order to obtain greater hardiness the best Russian apples were crossed with well-known American varieties, but the quality was poor. At one of the experimental farms in Quebec 76 different strains of tomatoes are being tried on.

The outdoor rose of highest excellence, the Agnes, according to the American Rose Society, is also another product of the Canadian Government Farm at Ottawa. This rose was recently awarded the Walter Van Fleet gold medal, the most coveted award of the A.R.S.

In addition to experimental work the experimental farm system is concerned with the control of fungus and other plant diseases, and laboratories have been established at various points with this end in view.

Strange Fish Has Three Hearts

Is Blind But Has Keen Sense of Touch and Smell

A very strange fish is found in Monterey Bay, California, called the hagfish. It is blind, and yet is so voracious that other fish are not found in the same waters. How does it manage to find its food? To make up for the loss of sight, the hagfish possesses a keen sense of touch and an unknown chemical sense—or what seems to be an exaggerated sense of smell. It has been noticed that when food is dropped into an aquarium where there is a hagfish, the fish instantly swims towards it. This fish, although blind, has rudimentary eye spots; they are not, however, in the least sensitive to light. According to Dr. David Starr Jordan, the hagfish, which is purplish-blue in color, varies in size from about eighteen inches to two feet, and in general appearance rather resembles an eel. Another peculiarity of this fish is that it has three hearts. Besides the main heart, it has, like the eel, one in the tail, and in addition to this another special heart for the portal system of veins.

An Underground Wonder

At the new tube station now under construction beneath Piccadilly Circus, London, an area of 15,000 square feet will be devoted to the smoking hall alone. This will necessitate the removal of about 10,000 tons of London clay. When completed the station will be able to handle 50,000,000 passengers annually.

B.C. Lumber For South Africa

Lumber from Vancouver for South Africa has been moving in greater quantities this year than for many years. Five ships, each carrying about 4,500,000 feet, have been loaded at Vancouver and departed. Within the next six weeks two more ships will load lumber for South Africa.

Looking For Lost Land

A society has been formed in Paris to rediscover a land lost for 11,000 years. The group believes that a continent in the Atlantic Ocean once connected Europe with the New World. Traces of it are being sought, and a library of books treating of the subject is being collected.

Garnet Wheat

Yields Forty Bushels Per Acre On Summerfallow at Brandon

Over 4,000 western farmers are testing Garnet wheat this year and there should be available for next year's seedling nearly 100,000 bushels. At Brandon, the Garnet has thrashed 30 bushels per acre on summerfallow and more than 26 bushels on stubble lands. Under dry season conditions, Garnet wheat has been known to yield twice the quantity as compared with Marquis wheat, and even under ideal conditions has always compared very favorably with Marquis. During wet, growing and ripening seasons the earlier maturity of Garnet materially assists in evading rust and frost. This earlier maturity naturally would tend to still further push the wheat-growing areas of the prairie provinces farther north and make wheat growing more secure in many of the older districts which have been subjected to late summer frosts.

Buy Canadian Coal

More Extensive Use of Canadian Coal Deposits Should Be Urged

It is to be expected that those engaged in the American coal industry will be anxious to maintain their hold on the Canadian market, but why should the rest of the people of that country be concerned over the lessening of shipments to this side of the line? The anthracite supplies in sight are strictly limited, and it is to their interest to have those conserved for their own use. The growing feeling in Canada in favor of more extensive utilization of Canadian coal deposits is not likely to undergo any diminishment, despite any steps that are taken across the border to curb it. With proper government encouragement to the building up of an inter-provincial coal traffic, Canadian consumers will look less and less to American sources of supply. *Edmonton Journal.*

Making Sugar From Sawdust

Product Made From Material That Is Otherwise Wasted

Sawdust sugar may soon be sweetening British afternoon tea. Dr. W. R. Ormady told the Congress of Chemists in London that a process of winning sugar from sawdust has now been developed to a stage where he believes it has commercial possibilities. In one experiment 65 pounds of sugar was obtained from 100 pounds of dry sawdust. At present, 25 per cent of the timber cut in the world is wasted in sawdust, Dr. Ormady said.

Oil Strike at Unity

It is reported that oil of 32 gravity, estimated at 30 to 50 barrels a day, has been struck by the Valley Oil Company, 15 miles northwest of Unity, Sask. The well was first spudded on June 15, and is working on a 12-inch hole. Drilling operations were resumed in an effort to reach the secondary sands. The report states it is the first oil well to be brought in in Saskatchewan.

Infantile Paralysis in Germany

Reports of infantile paralysis are becoming more numerous in Germany. In the Catholic orphan asylum at Hainover, it is reported that 21 children have been stricken and that five have died. Other cases are reported in Hainover and two in Spandau, near Berlin.

Expect As Big Crop As Last Year

Returns Would Indicate Above Average Crop For Western Canada

In the latest crop report, issued by the Manitoba Free Press, based on information received from over 300 correspondents throughout the provinces of Manitoba, Saskatchewan and Alberta it states that "taking into consideration the increased acreage in the western provinces, the outlook would appear to be for a yield as big as last year."

The question asked the correspondents included one as to the estimated yield, and commenting on the answers to this question, the report says: "We believe these will put aside the ideas of a poor crop in Canada this year." Last year's wheat crop in Canada totaled 111,375,700 bushels from 21,972,732 acres of which 382,359,000 bushels were grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. The average yield of wheat for the Dominion in 1925 was 18.7 bushels per acre.

The total production of oats in Canada last year was 513,381,000 bushels from 14,672,320 acres, an average yield of 35 bushels to the acre. Barley yielded 112,608,300 bushels from 1,075,395 acres, an average of 27.6 bushels per acre.

Last year's wheat yield was the second largest on record in Canada, the previous highest total being 171,139,000 bushels in 1923. Other high yields were 399,786,400 bushels in 1922, 300,858,100 bushels in 1921 and 292,542,600 bushels in 1915.

British Settlers Leave For Bolivia

Former Service Officers Will Form Settlement on Paraguay River

A party of British former service officers have sailed on a 666-ton river steamer for Bolivia, where they propose to form a new settlement and grow cotton and market timber. The Bolivian government, to encourage the settlement, has reopened Port Gaitan on the Paraguay River, which will afford water transport to Buenos Aires, giving Bolivia, for the first time, convenient access to the Atlantic Ocean, 1,500 miles away. All members of the British expedition are said to be experienced in tropical work.

Lethbridge Irrigation Tract

Crop This Year Is Expected To Be Worth \$2,000,000

The Lethbridge Northern Irrigation tract, opened for settlement a couple of years back, is, according to the Provincial Government report, proving prosperous to the farmers operating there. In 1925 the total production of the tract was valued at less than \$100,000. This year it is expected to reach \$2,000,000. Now towns are growing up following the extension of the railway and fine homes are being built.

The American Idea

Ideas of beauty differ. The French president has refused to give his assent to a proposal for the erection of a skyscraper in Paris, on the ground that such a building on the city's horizon would mar the regularity of the landscape. The American idea seems to be that the more the regularity of a landscape is marred for the promotion of business, the more beautiful it is.—Woodstock Sentinel-Review.

A non-rusting wheat has been developed at Winnipeg. Now for a bugless potato.

American Tourists Will Spend \$190,000,000 In Visiting Canadian Points This Year

Reward Wheat

New Variety of Wheat Being Tested Out At Ottawa

A new hard spring wheat which gives promise of being even better than either Marquis or Garnet, is being tested at the Canadian Government experimental farm at Ottawa.

The name of this new variety, it was learned is "Reward" which, according to tests made in recent years and are still being carried on, will ripen ten days earlier than Marquis. It is also believed "Reward" will have equally as good milling qualities and will give even heavier yields, because of the heavier weight. Measured bushels of "Reward" which have been grown in Ottawa weigh as high as 66 pounds.

Cerealist believe that if successive tests measure up as well as those of recent years have done, the "Reward" variety will supersede Marquis, the wheat that for 15 years has won the world's wheat prize at the International Grain and Hay Show at Chicago, and even Garnet, a new wonder wheat, which also ripens ten days earlier than Marquis, but which does not mill as white.

Free Homestead Lands

Still Available in the Three Prairie Provinces

In July of this year a total of 658 homestead entries were registered by the Canadian Government department of interior compared with 403 in July, 1925. Of the 658 entries 190 were made by settlers from the United States, the largest total of any nationality. The Edmonton district received the greatest number of entries with a total of 133. The Prince Albert district came next with 185 and Moose Jaw third with 113.

Homestead lands in free grants of 160 acres are available to settlers in the provinces of Manitoba, Saskatchewan and Alberta and in the Peace River block and the railway belt of British Columbia, on payment of a registration fee of \$19. If a settler is not British subject he must declare his intention to become one on filing on a homestead. These homestead lands owned by the Canadian Government are now a considerable distance from the railways and markets, but there are millions of acres of good farm lands in Western Canada near to railways that can be purchased from \$15 to \$29 an acre.

Increase in Population

An average increase of nearly five per cent in the population of twenty federal electoral districts in Manitoba, Saskatchewan and Alberta, as compared with the 1921 figures is shown in the quinquennial census of the three prairie provinces taken as of June 1st. The total population at these twenty electoral districts is given as 802,826, contrasted with 735,208 in 1921.

Delicate Woman

Police man. "It seems to be your fault, mister. It's a wonder you weren't killed! Why didn't you put on your brakes?"

Motorist. "My wife wouldn't let me! They squeak and make her nervous."

Unofficial estimates prepared by authorities of the United States department of commerce forecast an expenditure this year closely approaching \$500,000,000 by American tourists in Europe. To this they add \$150,000,000 as the amount that probably will be spent by Americans visiting Canada, bringing the total of this item, classified as an "invisible export," to \$650,000,000.

The amount spent in Europe, Canada and other foreign countries by American tourists this year may reach a much higher figure, as foreign travel this summer increased in volume, due in large part to lower rates for certain classes of steamship accommodations.

It is too early to determine, officials said, whether the alleged misstatement of American tourists in Paris, and the criticism heard in France and England arising out of the inter alled "dollar" situation, have seriously affected the outward movement of Americans. Department of commerce officials were inclined to believe, they said, that the troubles experienced by American tourists in France have not discouraged other Americans who plan to take their vacations abroad.

It was pointed out that whereas England in 1925, paid only \$187,000,000 in principal and interest on its debts to the United States, American tourists that year spent there at least \$400,000,000, according to figures prepared at the department of commerce.

"The expenditures of American tourists to Canada as reported from official and semi-official sources showed roughly a \$10,000,000 increase over 1924. Approximately 2,000,000 motor cars carrying 5,000,000 people entered Canada from the United States in 1925. These tourists probably spent \$15,000,000 in addition to \$15,000,000 estimated to have been spent by American tourists arriving by rail and steamer.

"The total spent by American tourists in Europe, Canada and elsewhere comes to \$650,000,000. To this may be added \$200,000,000 for expenditures of American residents abroad more or less permanently."

Wonders Of Plant Life

Believes Plants Have Their Own Hours of Sleep

Plants not only have their own, vanities and regular hours of sleep, but some possess a sixth sense as well, according to Sir Jagadis Bose, one of Britain's greatest scientists and authorities on plant life.

The sixth sense possessed by certain species is a mysterious force which permits them to detect minute changes in the intensity of light, changes that go unnoticed by the human eye.

The mimosa plant "pends its life in a jelly state. It wakes gradually between 8 and 9 o'clock and soon, remaining alert until evening and falling fully asleep only in the early hours of the morning.

Sir Jagadis has perfected a marvelous piece of apparatus which gives plants under observation a questioning shock every hour of the day and night and records the answers.

Indians' Prayer Answered

Members of Hopi Tribe Stage Annual Dance For Rain

Washes that seemed but harmless sand depressions in the desert, as throngs of visitors hastened toward the weird ceremonial of the Hopi Indians' snake dance at Flagstaff, Arizona, became raging torrents of muddy water within two hours after this year's prayers to the gods for rain were concluded.

The dance comes annually after eight days of preparation.

Last year also rain followed the dance and several motor cars were wrecked.

Will Junk This Year 1,000,000 Autos

Intensive studies by automobile manufacturers show that no fewer than 1,000,000 automobiles will be junked this year due to old age, accidents and other causes. Further estimates indicate that the number released from service will rapidly increase from year to year, until in 1930, 2,900,000 will be declared useless.

"Harold, my father doesn't like you very well."

"That's nothing; my whole family objects to you."

If a man amounts to anything in a small town he soon begins to think that he would amount to more in a large town.

College Students With Harvesting Outfits

Here is a group of over 40 husky lads from the Wye Agricultural College, Kent, England, and from Oxford University, photographed at the Canadian Pacific Railway station at Winnipeg, where they arrived from England recently to do harvesting in the prairie provinces. The boys have

been placed by the Woman's British Emigration League, two of whose representatives are here photographed with the group. The young men came from all parts of the Mother Country, and are members of prominent families there. The arrival of such a group is only another indication of the type of men who are scattered

throughout the west on harvesting outfits. Besides affording them the opportunity of building up physically, these young men realize that in no better way could they become conversant with agricultural conditions in the Canadian west. They will return to their school in England at the end of October.

McBEAN BROS.

453 1/2 Grain Exchange Bldg., Winnipeg

Ship your grain to the old reliable firm and be assured of satisfactory returns. Every car given individual attention. Liberal advances. Prompt returns. All premiums given to shippers.

WORLD HAPPENINGS BRIEFLY TOLD

Official statistics show that 3,271 persons have already been killed this year in 66 United States cities as the result of motor accidents.

After having been in Brazil for several weeks giving lectures and in other cities, Mme. Curie, co-discoverer of radium, sailed for her home in Europe.

What was apparently a meteor started the north midland counties of England when a mysterious explosion was followed by a sudden blaze of light.

Professor Wilk, a Polish astronomer, reports that he has discovered a new comet of the sixth class. Prof. Wilk last year discovered the VII Peltier comet.

At their home in Ottawa, Right Hon. W. S. Fielding and Mrs. Fielding recently celebrated their golden wedding anniversary. A large number of congratulatory messages were received.

Mrs. Anne Clarke, aged 55, is receiving the plaudits of all Donegal. She completed the mowing, tying and stacking of an acre of oats, the bulk of which was high, completing the task in a week.

Preparations are being made at Tokyo's great cat and dog cemetery, wherein repose the bodies of more than 20,000 pets, for the annual animal cemetery at which Buddhist prayers are said for their spirits.

United States citizens settling in Canada in the last 12 years brought with them cash and effects to the value of \$163,470,552, according to the department of immigration and colonization.

The government is now investigating the reindeer industry in Alaska, with the object of introducing this animal into the northern part of the Mackenzie district, which is the home of a considerable portion of Canadian Eskimo population.

Four hundred Mononites are expected to reach the west before the snow flies, according to Bishop David Twiss, chairman of the Mononite colonization board and land settlement board. Most of the newcomers will be placed on the land immediately on arrival.

Drivers of buses and street cars in Paris recently had grievances to air. Forbidden by their leaders to strike they showed their feeling by driving their vehicles at a snail's pace. Whenever a pedestrian desired to cross the street the driver would stop, remove his cap and bow.

A De Luxe Street Car

London Street Cars Are To Be Like Limousines

Their utility having been brought into doubt, London's street cars may still be saved by luxury.

By way of experiment the London council recently put a de luxe street car in operation along the Thames embankment. It contained seats as comfortable as those of a limousine. Special attention was paid to the lighting so as to enable passengers to read their newspapers without straining their eyes.

So popular has the car proved with passengers that the council has decided to order ten more of the same kind.

Plots Fomented Against Italy On Alien Soil Must Cease, Says Mussolini

Rome.—The bomb flung at Premier Mussolini failed to reach its mark, but instead achieved the startlingly unexpected result of causing the relations of Fascist Italy and Republican France to be more tense than any day since the black shirts entered Rome in October, 1922.

Saved from death by the alertness of his chauffeur, who stepped on the gas when he felt the bomb strike the motor car, the supreme chief of Fascism faced a mob of a hundred thousand cheering patriots and announced that Italy would demand that plots against her peace fomented on French soil must be stopped at once.

"This must end," shouted the premier to the immense gathering in Colonna Square, where the many black shirts, wearing white straw hats, resembled, in the gathering dusk, a white-capped sea. "We must put an end to the tolerance of parties culpable in these matters. It would be well for responsible governments to take note of this because otherwise their friendship with the Italian people may be fatally compromised. And we are ready to apply suitable methods for this purpose."

Premier Mussolini used the word governments in the plural and did not refer by name to his neighbor across the Alps, but it was crystal clear he meant France.

"Italy must not be disturbed by a handful of criminals. As I have abolished strikes so I shall abolish this sort of thing with the restoration of capital punishment. It will be less and less comfortable to endanger this regime and the tranquillity of the Italian people. I am not saying vain words but an astounding fact," declared the premier.

First Message Between Irish Governments

Ulster Expresses Sympathy With Free State Over Cinema Tragedy
Droichead, County Limerick, Ireland.—Forty-eight of the people who perished in the fire which swept a cinema building where a moving picture was being shown, were buried in the local churchyard in a common grave. Twenty-six of them were buried beyond identification.

Belfast, Ireland.—For the first time in history a message of sympathy has passed between the two Irish Governments.

Finance Minister Hugh Pollock, acting in the absence of Premier Craig, telegraphed President Cosgrave, of the Free State executive council, expressing Ulster's profound sympathy with those bereaved in the cinema tragedy at Droichead.

Plans Visit To Palestine

Prince of Wales Will Dedicate War Cemetery Next Year
Jerusalem.—The Prince of Wales will visit Palestine during April of next year, to dedicate the war cemetery on Mount Scopus, it is learned here.

General Sir George Macdonough, Sir Frederic Kenyon and Lord Arthur Broun have inspected the war graves on behalf of the British war graves commission.

"Red" Plot Bared

Sofia, Bulgaria.—It is announced by the police that they have discovered a vast organization of young Communist conspirators having their headquarters in Sofia and branches all over the country. A number of arrests have been made throughout Bulgaria in connection with the affair.

Problem Of Britain's War Debts To U. S. Is Definitely Settled

Quebec.—That inssofar as sound public opinion in England was concerned, the problem of Great Britain's war debt to the United States was settled and there was no question of the British Government re-opening the matter was the statement made by His Excellency, Sir Esme Howard, K.C., M.G., C.V.O., British ambassador to the United States, who is in Quebec for a brief visit.

"The only thing I can say," declared Sir Esme, when asked regarding the current debt cancellation rumors, "is to repeat the recent statement of Sir Austen Chamberlain, British secretary of state for foreign affairs. That is, that the question has been settled and it is not for us to reopen it. Everyone in England intends to pay the debt as long as there is a possibility of paying and there seems to be no reason why it should not be paid in its entirety."

Oppose Wage Increase

Railway Companies Present Their Case In Wage Dispute

Montreal.—Maintaining that the present cost of living and the rates of pay now in existence as they affect conductors, trainmen and yardmen on the C.N. and C.P.R. do not justify an increase in wages, representatives of both railways presented their case to Mr. Justice Hugh T. Kelly, of Toronto, and his two colleagues on the board of arbitration and conciliation now attempting to arrive at a settlement in the wage dispute between employees of the two railways and their employers.

The railways point out that the existing rates were established by a board of conciliation in 1921 and that since that time the railways have suffered substantial reductions in passenger and freight rates and the cost of living has also decreased somewhat. The existing wage scale, they point out further, is the outgrowth of conditions developed during and subsequent to the war.

With regard to the present applicants who, the railways claim, are among the highest paid classes of railway employees in the Canadian service, the joint statement of the companies points out that the application is identical in all respects with those already submitted to and declined by the United States roads.

Would Take Drastic Action If Necessary

British Government Is Ready To Assist Mine Workers

London.—The decision of the mine owners to refer to the various districts the question whether the executive shall be given power to negotiate with the miners for a national agreement is a result of Churchill's threat that the government having given a guarantee of fair play to the miners, would, if necessary, take drastic action against the owners if they persisted in their die-hard attitude.

The official report of the proceedings of the conferences, as issued by the government, was carefully edited for public consumption, but it is understood that Churchill during the meeting expressed himself with force and emphasis and told the owners that it was impossible for the government to allow mere stubbornness on their part to prevent a settlement if the miners were willing to make real concessions as it seems they are prepared to do.

Canada Not A Candidate

Will Not Ask For Seat On League Council Says Sir George Foster

Paris.—The Geneva correspondent of Excelsior, a daily paper of Paris, states that some of the British dominions are urging Canada to ask for a seat on the league council, but he adds that Sir Austen Chamberlain, British foreign secretary, is not in favor of this. Other powers, the correspondent says, are not in favor of the proposal.

Sir George E. Foster, in reply to a query at Geneva, said that Canada was not a candidate for one of the nine newly created non-permanent seats on the council.

Ends State of War

Madrid.—King Alfonso signed a decree ending the state of war which was proclaimed throughout Spain in consequence of the unithous movement in the military corps.

Report Is Encouraging

Selected Immigrants Making Good Says Overseas Representative

Winnipeg.—Under the selective plan of immigration, the families being brought to Canada from Great Britain are proving themselves willing farmers, and are making good, according to Rev. J. W. Williams, overseas representative of the British settlement service.

In connection with the activities of the service in Great Britain, Mr. Williams stated that lack of interest and lack of money were the two great obstacles which have to be overcome by those seeking to attract immigration of a desirable character to Canada. He considered that the former problem would be met gradually as those who have immigrated made good, but that the second difficulty is one of economics which can only be adjusted by some form of legislation or a general betterment of conditions that is not apparent at the present moment.

Trade Council Will Include All Canada

Convention Next Year Is To Be Held In Victoria, B.C.

Seattle.—Inclusion of all Canada in the Pacific Foreign Trade Council was announced after a conference here between Canadian officials and commercial leaders and representatives of the council. The next convention of the council is to be held in Victoria, B.C., on September 15, 16 and 17, 1927.

Heretofore the coast trade group, which constitutes the western division of the National Foreign Trade Council, has included only six states in this country. Under the new scheme British Columbia and all the other Canadian provinces, it is hoped, will unite their strength with the coast in meeting problems of mutual shipping and commercial interests.

Continue Customs Probe

Inquiries In Maritime Finished and May Be Resumed In Vancouver

Montreal.—The royal commission investigating the administration of the customs department has now finished its inquiries in the Maritime province and will probably proceed at the beginning of next month to Vancouver, it was stated by R. L. Calder, K.C., counsel for the royal commission.

After Vancouver the commission would probably proceed to Windsor, Ont., and Toronto.

Mexican Church Laws

Mexico City.—Each foreign colony or church composed of foreigners may be allowed one foreign minister of religion by the new religious regulations which are being drafted by the department of interior for presentation to Congress.

Trying To Cap Volcano

Managua, Nicaragua.—German engineers are engaged in the unique task of trying to put a cap on a volcano, Masaya, which is near the town of that name. They seek to close the crater so that its poisonous gases will not escape and damage the crops.

She Dances to the Waterfall

The wonderful setting of the little waterfall known as the Giants Steps, Paradise Valley, near Lake Louise, apparently inspired this nature-dancer with the spirit of life, and with the song of the water and the soft whistling of the bird-life abounding in the woods around. She was photographed while dancing to the music of her soul.

Canadian's Serve On League Committees

Representatives Have Been Appointed On Six At Geneva

Geneva.—Canada secured representation on all six committees of the League of Nations assembly.

Sir George E. Foster serves on the first committee, which deals with legal and constitutional questions.

Sir George is also a member of the sixth committee, along with Dr. W. A. Riddell, permanent representative of Canada at Geneva. The sixth committee deals with political questions.

Hon. Philippe Roy, Canadian commissioner-general in Paris, takes his seat on the second committee, handling technical and organization questions.

The third committee considers the question of the reduction of armaments, and Hon. Mr. Roy and Sir Herbert Ames, financial director of the League of Nations, represent the Dominion thereon.

Sir Herbert Ames was elected also as a member of the fourth committee to deal with finance.

Dr. Riddell is on the fifth committee, which handles social and general questions.

Trouble In Spain

Belief Is Expressed That Revolt Is Only Sidetracked

London.—Uncensored dispatches from Spanish correspondents of some of the London morning papers represent the trouble in Spain rather as having been sidetracked than definitely overcome by authorities.

A dispatch to the Daily Express from Barcelona reports that the army in Spain has been split in two, that there have been mutinies throughout the country and that the navy is exhibiting unrest.

Hundreds of apprehensive Spaniards are said to be fleeing into France to invest their capital there.

New Zealand Is Loyal

Dominion Must Be Kept British Says Prime Minister

Auckland, New Zealand.—"We must keep New Zealand British," declared Hon. J. G. Coates, Premier of New Zealand, during an address to his constituents at Knapen Harbor.

"If others adopt New Zealand as their country," he continued, "they should become loyal to our constitution and our flag."

No doubt existed in the minds of New Zealanders, he said, as to where they stood within the empire or about their loyalty to Great Britain. Their object must be to bind the empire together.

Encourage British Emigration

London.—In a letter to the Morning Post, Lady Aberdeen suggests a plan to encourage British emigration to Canada, namely that brothers and sisters of all classes should go out together, claim their land grant, take service with neighboring farmers and learn farming and the customs of the country while watching over the erection of their house and the preparation of their farm.

Sixteen Hundred New Settlers Arrive In Time To Assist With Harvest

Studying Industrial Conditions In Canada

Sir William Mackenzie Heads Mission Sent by British Government

London.—Sir William Mackenzie has left London for Canada as head of an industrial mission sent by the British Government to study industrial conditions in Canada and the United States. He will first go to Ottawa to consult with the Canadian department of labor and then will visit the principal industrial towns throughout the Dominion, right in the Pacific Coast.

After his Canadian tour, he will visit the United States and return to England via Canada. He is being sent by the British ministry of labor to investigate particularly the character of the relations between employers and employees in various industries in Canada and the United States. A commander and a knight of the British Empire, Sir William is said to be the greatest expert on industrial relations in Great Britain. He has served on a score of arbitration and industrial commissions.

Raise Telephone Rates

Alberta Government System To Increase Rates From Oct. 1st

Calgary.—The telephone department of the Alberta Government has made an all-round increase in telephone rates for the entire province.

In the city of Calgary, rates will be raised from \$30 to \$36 a year for residence phones and from \$60 to \$72 a year for business phones. In rural districts the advance generally is \$5 per annum, the rate varying according to the locality and the cost of urban system. In the Calgary district where rural residence phones were \$36 a year the new rate will be \$36. In the case of Leduc, for instance, where the rate was \$24 annually, the increase brings the price up to \$26. The new rates will be effective October 1.

India Wants Self-Government

Is Country's Ambition Says Maharajah At League Meeting

Geneva.—An incident compelling international attention in the League of Nations assembly was India proclaiming with no faltering voice her ambition to become a self-governing country, like Canada or Australia. Speaking in perfect English, then translating his own address into faultless French, the Maharajah of Kapurthala, attired in the latest occidental garb, spoke feelingly of the awakening India, voicing the hope that she would soon become "a united and self-governing country like Canada or Australia."

Slashed With Razor

Banff, Alta. Buffalo Child Long Lance, well-known Indian writer and publicist, was slashed with a razor in the hands of a negro servant of Mrs. J. J. Sheridan, of Chicago, and the negro was beaten senseless by Long Lance, wielding a heavy iron poker. Both are in hospital here. The trouble is said to have occurred when the negro became abusive while Long Lance was an evening guest at Mrs. Sheridan's house.

Resentment Displayed By British Labor Over Criticism By Soviets

Hournemouth, Eng.—Two sensational incidents occurred at the meeting of the Trades Union Congress, which is sitting here this week. Strong resentment was displayed by the British trade union body at the attempt of M. Tomsky, a Moscow labor delegate whom the British Government refused to permit in England, to impose the Soviet standard of criticism on the conduct of the late general strike.

The second was the hostile reception by the others' delegates of the railway representative, J. Bromley, although he put forward to plead their cause.

The Tomsky incident arose out of the circulation among the delegates of an abusive telegram, signed ostensibly in behalf of the all-Russian central council of trade unions by Tomsky, attacking the British Government, which it accused of admitting

Winnipeg. Arriving in time to assist in harvesting operations in Western Canada, more than 1,600 new settlers have reached Canada over the weekend through Quebec and Halifax.

The majority are destined for points in Western Canada. Six hundred of the new arrivals were on the Lethia arriving at Quebec, Sunday. These include a special party of 12 being brought out under the auspices of the Salvation Army for settlement in Eastern Ontario. The majority of the Lethia passengers, however, are for Western Canada and are for the most part drawn from rural Scotland.

Others are arriving on the Doric, Anania, United States, Rosillon and Arable.

Students, office workers and in some instances business and professional men are responding to the emergency call for harvest labor in the western grain fields. Thousands of workers are still required to fill the steadily growing demand pouring into the local employment offices.

A batch of students and clerks who had been temporarily released from their employment were sent out to various points. The ranks of the westward bound harvest hands have also been augmented by 1,335 men from the United States since the railways lowered their rates as an extra inducement in bring workers. Immigration officials stated that an additional number of men were now on their way from the south.

New Motor Fuel

Experiments Show That Grain Dust Runs Auto Engine

Washington.—Grain dust taken from a grain elevator has been found to have sufficient explosive power to run an automobile engine.

Department of agriculture chemists, who conducted tests, announced that while the engine did not make any prolonged continuous run, enough power was developed with the dust to turn it over many times.

A hand system of feeding the dust through a tube to the intake valve was employed.

The experimenters said the study gave "encouraging results which indicated the possibilities of designing an engine to use grain dust as the source of fuel."

A Handsome Bequest

Late Baroness Strathcona Left Montreal Hospital \$121,500

Edinburgh, Scotland. The will of the late Baroness Strathcona, who died on August 18 last, which was filed at Register House here, is dated November 17, 1925, and includes, among other public bequests, one of £25,000 (about \$121,500) to the Royal Victoria Hospital, Montreal.

Baroness Strathcona was a daughter of Lord Strathcona, a former high commissioner for Canada in London, and succeeded to the title upon the death of her father in 1911. She was married in 1888 to Dr. Robert Jared Bliss Howard, of Montreal, who predeceased her in 1921.

Algoma Oat Crop Fails

Sanit Ste. Marie, Ont.—According to reports reaching here, the oat crop in practically every farming district in Algoma has been a complete failure this year.

Submarine's Long Journey

Dutch Vessel Travels Ten Thousand Miles Without Escort

When the Dutch submarine K XIII, arrived at San Francisco, it established a new record for a submarine without the protection of a convoy. The long slender craft in its trip from Helder, Holland, travelled about 10,000 miles.

The long voyage, part of which was under water, was made without accident, although Lieut. Commander I. C. A. Van der Kna, the boyish commander, who has piloted submarines for the Netherlands for ten years, was pessimistic throughout the entire trip.

But for that matter I am always pessimistic on a submarine, for that is satisfied," he explained. "I do not let even the men become optimistic. The regular rations of Holland ght which the navy gives to every sailor, prohibited by me on the submarine, on the surface ship it is all right. You see on a surface boat the men may drink gin and get optimistic. It may be, but under the water they must be serious and take no chances."

The K XIII did not spend a great part of her voyage under the waves, but plowed slowly along on the surface at eight knots an hour. The craft can travel eighteen knots, but the commander barred speed in the long distance run.

The K XIII embodies the latest idea in underwater ship construction. It was commissioned last March. The boat is propelled by two engines, six cylinder engines, which develop a total of 2,400 horsepower. They use gas oil, which is an economical fuel.

Commander Van der Kna said the trip was without any outstanding experiences. The remarkable thing about it was the unbroken monotony. The ship never lost its bearings during the entire trip, save when inside the placid harbor of San Francisco.

"No they do not," the commander said. "The submarine cannot do that, at least not in the present stage of its development, but it has a definite place in having about unnoticed and discovering the whereabouts of the enemy."

"Every nation is working on the submarine. It certainly has not been outlawed. Green Britain, who has chosen a series of submarine warfare ten years ago, is now building some of the world's finest underwater vessels. Japan is following suit."

Commander Van der Kna, talking about the comforts of submarine life, thinks it is apparent to any observer that long trips on a submarine entail hard life and cramped living, breathing of foul air and lack of the necessary food supplies.

Navy officers in Holland share submarine service," he smiled, "for they take privacy and comfort on ship board. But as for me, I think I shall stay with the submarine as long as it is the pleasure of my government to keep me in service. And I think that the first voyage on this trip were the last."

Made Good Attempt

Nordic Girl Evidently Had Trouble With Telephone Message

Are you a student of uniform writing or the ancient sunsets? Then ponder this one. A Nordic maid, after an apparent struggle with a telephone, wrote the following message when she gave to her mistress, on her return from a New York theatre party at night.

"Miz Moks coldup sez zuna yakomen golomp sez nomatter how lets comberbe golomp."

All of which was finally translated to read:

"Miss Marks called you up and said as soon as you come home to call her up, no matter how late it's going to be to call her up."

Scotch Golf Story

Furman McCall Mitchell tells of a friend encountering a Scotchman, just back from the Florida golf courses, struggling up Broadway dragging an alligator.

"What's you doing with the alligator?" he asked.

"The son of a gun has got my ball," replied the Scotchman. New York Sun

Spoke Frequently

Doctor: Did your wife say anything before she died?

The Whistler: Yes, she talked unintelligibly for fifty years.

Guess Who

Jerry: "A fool! Do you mean me?"

Mae: "Oh, no, not exactly. I mean the fellow you stare in the face while you're shaving yourself."

Gossip might appropriately be termed misfortune tellers.

W. N. U. 1916

Problem Of Handling Fish

New System Evolved Which Is Said To Be Satisfactory

The transportation of fish has always been an important problem in Canada where the distances between centres of population are considerable and the summers are warm, says the Natural Resources Intelligence Service of the Department of the Interior at Ottawa. Refrigeration has been the chief method of packing fish for travel, but this is a costly process and requires that considerable quantities be landed at one time. Leakage from melting ice, the extreme perishability of the product and the need for re-icing and prompt sale, has made this traffic a more or less distasteful business that must be constantly kept separate from dry freight.

The whole problem of handling fish in limited quantities between the producer and consumer is now practically solved by the use of insulating cartons, according to information now available. A concern on Long Island has succeeded in perfecting a simple package that will keep the fish dry and in good condition for travel, and which may be sent either by express or by parcel post, depending on the size. A writer in "Packaging and Shipping" (New York) has the following to say of these packages:

"The carton runs in four sizes to carry 12, 20, 30 and 50 lbs. and when filled make unit packages weighing 12, 28, 32 and 60 lbs."

"One unique feature of the shipping carton is the insulation inside. This is in the form of air chambers which are filled with dry sea grass and a top cover of the same kind provided. The entire parts of the fish are wrapped up in two pound packages, in vegetable parchment paper and tied with a ribbon of tying material. No preservative is used."

"The success of this new system is attributed to the fact that by having a hermetically sealed compartment with the commodity pre-cooled, a low temperature is maintained until the box is opened at destination. In fact, it has been found that a fish carton can ride 48 hours without damage to the contents."

Canada is fortunate, comments the Natural Resources Intelligence Service, in possessing vast quantities of suitable insulating seaweed (eel-grass) close to its Atlantic fisheries. Each tide brings in its quota of leaves torn by the tide from vast submerged mats of the growing material. This is gathered by ox teams and hauled out on the gravel beaches to dry, much like hay.

Belgrass makes an excellent lining for houses through its ability to prevent the passage of heat and it is excellent as a sound deadener and, in fact, for all purposes that an insulating material is required.

An Ancient Superstition

Unless Notified of Death in House Bees Would Swarm Elsewhere

In leaving instructions for a message to the bees to be printed on his memorial card, Alfred George Gambrell, the Richmond bee expert, conformed to an ancient tradition.

It used to be deemed necessary, when a death occurred in a household, to go at once to the hives, tap three times, and inform the inmates of the event, otherwise they might take offence and desert the stricken house. In some places the hives were draped with black on such occasions, and portions of the funeral cake, soaked in wine, inserted in each.

Only a few years ago a writer in a London Journal told how, at Hyde Green, Essex, he was told by a farmer that all his bees had gone off and swarmed elsewhere because "when my poor brother Dick died we forgot to knock on the hives and tell them that he was dead." London Correspondence.

Popular Belief Disproved

Thin Glass Stands Heat Better Than Thick One

Most people believe that a thick tumbler stands heat better than a thin one. Science, however, discounts this belief, since it has been proved that glass is a very poor conductor of heat, and when hot water is poured into a thick glass tumbler, the inner layers of the glass are soon at a much higher temperature than the outer layers. This high temperature causes a great expansion, and the outer layers are then burst by the expansion of the inner ones.

Pacific Whaling Operations

Whaling operations off the coast of British Columbia this year have been very successful, and to the end of July the fleet had caught 182 whales. There are only six steamers operating this year, while last year the number was eight. The weather has been good to date and very little loss has been encountered.

Woman Has Queer Occupation

Catalogues Skulls in Museum of Royal College of Surgeons

In a fifth floor room in Lincoln's Inn Fields, London, when all outside was bright and smelt, a woman sat at a table faced by a row of gleaming skulls.

To her right hand and her left were skulls and yet more skulls, while in other parts of the room were human bones on which rays of light danced with gruesome brilliancy.

In the gardens below young people played at tennis, and happy laughter of the street floated into this mortuary chamber.

The woman? She was perhaps the coolest woman in London. Not a glance had she for those poor grinning heads and stacks of bones that once were living people. Instead, she was latent upon writing, and went on and on, making notes as though unconscious of her grisly audience.

Had Scotland Yard's "Big Five" dashed into the room at that moment they would have found—not the most horrifying mystery of the age and a confession on which the ink was still wet, but a solemn cataloguing of the thousands of skulls which are the property of the Royal College of Surgeons.

Miss Miriam Tildesley is quite at home in her room, and in spite of long association with skulls and crossbones, has not forgotten how to smile.

Her work is the subject of a flattering reference in the annual report of the conservator, who mentions that for the past year Miss Tildesley has been engaged in verifying the histories of the native Indian and Chinese skeletons in the museum of the college, and more particularly in establishing the genuineness of the Vouda specimens—a point of importance, since that race is ceasing to exist in its original purity.

Law Education Standard High in Canada

Standard Compares More Than Favorably With that of U. S.

The standard of education in the law schools of Canada is high as it is comparatively low in the United States, according to addresses and reports delivered at a session of the eleventh annual meeting of the Canadian Bar Association in Saint John, N.B. This was brought out during the report on legal education presented by J. E. Read, K.C., dean of the faculty of the Dalhousie Law School at Halifax, and an address on legal education in the United States, delivered by Dr. Everett Fraser, dean of the faculty of law of the University of Minnesota.

Butter Production Increases

With 79 creameries operating, Saskatchewan produced 3,068,681 lbs. of butter in the month of June. This is 143,390 lbs. more than last year's peak month which was reached in July, with 69 creameries turning out 2,925,291 lbs. Production for 1926 is expected to run 33 per cent. above that of last year. The greatest success is in the central part of the province.

Kept Busy Changing Dates

In 1911, C. N. ("Grandpa") Mohr, of Fremont, Neb., then 81 years old, carved his own tombstone and inscribed "1911" on it. In 1920 he changed it to "1920." Recently he celebrated his 96th birthday and his principal recollection was that he might have to change the tombstone to "1931."

Changed His Mind

Attorney—"Sam W. Jackson, do you promise to tell the truth, the whole truth and nothing but the truth?"

Witness—"Huh! If you is gwine to act thataway I ain't got nothin' to say whatsoever!"

An Inland Seaport

Ships Travel Thirty Miles Through Canal to Manchester

All the ingenuity of building engineers is represented in the Manchester ship canal, which makes this city an ocean port thirty miles inland.

The canal crosses a river and a canal, and live railroad bridges were raised on long grades so that large vessels might steam into Manchester.

The Bridgewater Canal, handling horse-drawn barges, crosses the Manchester strip without their waters meeting. This is accomplished by actually carrying the smaller canal across the other on a high swinging bridge.

Gates at either end of the water bridge shut the water in the channel, close the exposed end of the canal, and bridge, water and all are pivoted around.

The canal, which cost £14,000,000, was constructed to fight the high rates charged at Liverpool for dockage.

Ship pass through a system of locks to Manchester, where the water level is sixty feet higher than the ocean.

Near the mouth of the canal, it is crossed by the Gowry River, up which the tidal waters flow. This river is piped beneath the canal in huge siphons of cast-iron, twelve feet across and 400 feet long.

The canal terminates in eight docks, branching in groups of four on either side of it, covering 120 acres, with 286 acres of quays.

Along the dock quays are transit sheds and warehouses, and in front of, and behind these, are railway lines connected with all the great railway systems.

Two grain elevators with a total capacity of 80,000 tons can take grain from vessels at the rate of 500 to 900 tons an hour, while under the quays on both sides of the docks, reached by manholes, are endless moving bands, electrically driven over rollers, carrying the grain in streams sometimes half a mile long to the elevator at the dockhead.

Tigers Fear Wild Dogs

India's King of the Jungle Dread Their Coming

In the unpleasant looking wild dogs of India may be found an excellent illustration of the old saying, "United we stand, divided we fall." Evil-smelling, evil-looking, shuffling things, and yet the lordly leopard knows and respects them and keeps out of their way.

These wild dogs hunt in packs of varying sizes. In the Central Provinces they are well known and hated alike by villagers and dwellers in the jungle. Hunting by night, and occasionally also by day, they sweep through the forests, tearing down indiscriminately and devouring whatever game they can find. Deer fly in terror before them, and not even the doughty sambar deer tarry to offer combat.

The great killers of the jungle, such as the tiger and the leopard, also dread the coming of the wild packs, for the latter clear the jungle of life for miles around by either devouring or scaring away the game.

Urges Brighter Clothes For Men

A plea for brighter lined garments for men was recently broadcast from a New York radio station by Dr. Winfred Sackville-Stoner, child psychologist, and Mrs. Oredella Rexford, Mrs. Rexford advocates dress suits of purple, dark green, brown and blue velvet. Edwin Markham, the poet, has volunteered to introduce the colorful styles by wearing a suit of purple velvet, with a green and yellow vest.

The good die young, which is due to the fact that they never live long enough to get a chance to be bad.

Danger In Broadcasting

Listeners In Are Likely to Hear Telephone Conversation

Broadcasting, since it began to employ land lines, says the London Times, has brought a new danger to users of the telephone. The danger that their conversation may be accidentally broadcast and listened to by thousands of persons who are normally receiving from a broadcasting station. On a Sunday night, about three months ago, at the end of a service broadcast by the Nottingham Station, the Benediction was interrupted by a quarrel over the telephone between man and wife. More recently a newspaperman in Aberdeen, had an important conversation with another in the north of England by telephone, and he complained "shortly afterwards I was horrified to find that this private conversation had somehow been broadcast."

The British post office, which is responsible for all the telephone lines, is usually unable to explain how the contact occurs and is unable to suggest a means of preventing it in future. It claims, however, that such accidents are rare, and thinks that the difficulty will be overcome when all telephone wires are laid underground. —Toronto Mail and Empire.

Improved By the Printer

Poems That Are Better Because Of Slight Error

The psychology of printers' errors is an unusual topic for the British Association, but Professor Spearman was unfortunately not able to point out any way to avoid them. A writer in the Evening Standard says that he knows a poet "who boasts in one of his poems an exquisitely appropriate epithet, due entirely to the printer having been unable to read his writing correctly." But does not something like that happen to Gray? The story is that in the first line of the Elegy he put a comma after the word "tolls":

The curfew tolls, the knell of parting day,

that the printer left it out, and that the poet approved and accepted the amendment. —London Observer.

The Vastness Of London

City Houses Eleven Thousand Persons To Square Mile

Residents of London, as well as visitors, are quite unequal to visualizing that 8,000,000 persons dwell in Greater London. This is 2,000,000 more than the vast continent of Australia and only 1,500,000 fewer than the population of Canada. There are 11,000 persons to the square mile in London, compared with less than two in Australia, says the Vancouver Province. Based upon their taxable value, the buildings of London are worth \$200,000,000 and it would require the whole lifetime of several persons merely to look at them. Greater London has 2,300 miles of streets and their upkeep costs \$15,000,000 a year.

Tourists Going To Russia

Not since pre-war days have there been so many tourists in Russia as there are now. The hotels in Moscow and Leningrad have been forced to provide accommodations for travelers in private houses. Nearly 400 South American tourists, mostly Argentines, have arrived, bringing the number from North and South America alone to almost 500.

A waterfall is hotter at the bottom than at the top, because the water generates heat as it strikes the ground.

It's the love of money that is the root of all evil; money itself isn't an evil unless the other fellow has it.

To Study The Reindeer Industry

Government Investigating Possibilities of Introducing This Animal Into Northern Canada

Entirely aside from the humanitarian aspect of the matter all authorities are agreed that the development of the far northern parts of Canada is dependent upon the maintenance of a healthy and vigorous native population. The experience of the Danish authorities in Greenland and of the United States Government in Alaska has shown that there are important revenue-producing industries to be developed which will also provide the natives with a profitable occupation suited to their condition and mode of life. In the successful efforts that have been made to meet the change caused by the depletion of wild life, the aim has not been to make the Eskimo into a white man, dependent upon support from without, but by wise direction to enable him to progress as a happier, healthier and more prosperous Eskimo.

In Greenland advancement has been made along diversified lines of industry; in Alaska the chief avenue of progress has been through the introduction of reindeer. As Alaska is contiguous to Yukon and the Mackenzie Valley, the Government of Canada, through the North West Territories and Yukon branch of the department of the Interior, is now investigating the reindeer industry in Alaska, with the object, if possible, of introducing this animal into the northern part of the Mackenzie district which is the home of a considerable portion of our Canadian Eskimo population. Before embarking on a project of such magnitude it is necessary to ascertain whether the northern part of Mackenzie district is a suitable range for reindeer and also to secure first-hand information as to the methods of reindeer herding and management which have made the industry so successful in Alaska. With these ends in view the department of the Interior, with the consent of the United States authorities, has sent two experts to Alaska who will make an investigation of the reindeer situation there in all its aspects and who will then travel on foot through the Arctic coastal region to Akhavit in the Mackenzie River delta and thence easterly to Coronation Gulf and Chesterfield Inlet, noting as they proceed the best route for the driving of a herd of reindeer, should the plan be found feasible. In all this northern district they will make a thorough study of the plants of the region to ascertain whether the supply of fodder is sufficient, and also report on all the other conditions necessary to the successful raising of reindeer.

Is Czar's Fortune In London Bank

Sixty Million With Interest Said To Be On Deposit

A remarkable statement with reference to the private fortune of the late Czar of Russia, has just appeared in the Italian Press.

On the authority of "a high personage formerly at the Court of Nicholas II," it is declared that a capital sum of approximately \$60,000,000 plus accrued interest, is still on deposit in London for the late Czar's account and that the surviving members of the Imperial family are disposed to leave the manner of its distribution among them to the decision of some such arbiter as King George or King Victoria Emmanuel.

There is a difficulty, however, in the absence of legal proof that the Czar and his family are dead.

According to the authority quoted, the Czar's fortune, deposited in London, was at the outbreak of war very much greater than the sum now mentioned. Quite half of it, however, was withdrawn by him and employed in meeting the needs of his country and in alleviating wartime distress. After the revolution further considerable sums were withdrawn to finance plans for the escape of the Imperial prisoners.

But if the Czar's London fortune really exists only a few people know the secret of its whereabouts.

Canadian Honey

Canadian honey is rapidly insuring itself a permanent market in Europe, Holland especially being a heavy purchaser of this commodity. The export figures for the eleven months ending February, 1926, are: Netherlands, 604,000 lbs.; Germany, 450,000; United Kingdom, 317,000; United States, 55,000; Denmark, 14,000; all others, 26,000.

Bow! Wow!

Harold—"There's the handkerchief you dropped last night, dear. I slept with it under my pillow and I've kissed it a thousand times."

Alice—"That isn't my handkerchief. That's little Phil's sweater."

CHAPTER XIV.—Continued.

She talked on, saying things that were meaningless to Joanna, the obvious things that had to do with the beginnings of a new friendship, and the prospects of a "jolly" time for the girl in a new life. A trim, lace-trimmed and white head-dressed maid answered Yvonne's summons and replied to her mistress's questions that Miss Manners' apartment was in order.

"I've a little bedroom and a cozy sitting room for you, not too far from my own," Yvonne explained. "I hope you will be no end comfortable."

At a finger touch a gold panel in the wall of the reception hall slid back, disclosing a tiny gilt elevator of the kind that is automatic. The maid followed them into the lift and pushed the buttons that sent it climbing to an upper floor. Joanna was strangely tremulous. She wanted to say bright things to the older woman who was ushering her into these new and luxurious surroundings, but her mind was in a uneasy turmoil. "Why was everything happening as it was? So suddenly, so swiftly, so smoothly? Should she trust herself to Yvonne Contant?" She stole a glance at the woman who stood so close to her, and comprehended her extraordinary fascination, the hair that was as black as volcanic, the magnolia-white face contrasting sharply with the two luminous black eyes, and the lips that were full and red without the exaggerations of lip stick contours. The fear that vibrated through her at times with Brandon, the indubitable fear that seemed so unreasonable, gripped her for a second. Then her thoughts flashed to what Teddy Dornmaster had said in the room downstairs: "A singer, or a dancer, or something like that?" What was there wrong about her? She had put on her grey tailcoat and the black coat. And her smart, grey cloche hat was from a famous Yvonne shop. Did she still remember one of the silk counter? And if she did, what of it? Weren't the indications of the silk counter all right? Certainly there had been no girl in her merry-go-round—fasten you can—without

skidding crowd, who could profess to cause men's wives to need consolation because of them. But, of course, Yvonne had not been serious! It was just a manner of talk; the small talk she would have to learn.

All of these things dashed through the girl's agile mind while the tiny gold elevator lifted from the first floor to the third. When the car had stopped, and the maid had slid open the narrow gilded door and stepped out, Joanna had dispersed her doubts with a determined wave of confidence. The arrogance came back into her eyes and to her lips. "She'd get on, or she'd taken an awful wallop trying."

Yvonne swept the girl's face with a quick glance. "What do you know about me?"

It was difficult for "Miss Twenty-seven" to understand, for a time, that the exquisite miniature drawing room, rose shaded and satin hung, with windows looking down upon an open garden, was to be exclusively her's. With John, through such evenings as she had consented to stay in with him, she had planned, or rather, listened to him plan, the house that he would some day build for themselves. They had endowed this dream house with many idle fancies, but in her visions there had been no such splendours as the "little" room, with its rose bedroom and canopied bed beyond the softly draped door, which Yvonne had prepared for her. And Yvonne was saying:

"You will want your own maid, of course. But I haven't engaged one. You will want to engage her yourself. I fancy Walker can send you a collection of them—he has a way of producing them when they're needed. I shall advise a French girl, or an English one. The first will be more skilful, the other more loyal."

Joanna couldn't stifle her laugh. "You'll have to tell me what to do with a maid," she explained. Then something like a phantom of tears hovered suddenly in the deep brown eyes. "You know, I feel terribly alone," she said, "and terribly afraid of myself, I mean."

Yvonne swept the girl's face with a quick glance. She spoke quietly to the maid who fluttered about the room. The maid went out, closing the door behind her. To Joanna Yvonne said: "Come and sit down." She indicated the divan beside her. "If you'd like one there are cigarettes in the box on the tabouret. I think I'll have one, too." Before she spoke again she drew a contemplative puff and allowed the smoke to curl slowly from her lips. Joanna watched her silently. Her first words were abrupt.

"There are a great many people who enjoy themselves talking about me," she said. "And some of them

take an especial delight in talking in whispers. What do you know of me?"

"These were turtles that would not disconcert Joanna. She was too accustomed to making sudden attacks herself, or defending them. "Only what everybody knows," she replied frankly. "We read about you, you know, and your pictures always are in the newspapers. I've thought more of you than I ever did of a motion picture star, and that's a lot."

"Why?"

"This was more difficult. The girl hesitated, faltered. Again Yvonne's voice, clear, bell-like, clipped the one word:

"Why?"

"I think," Joanna ventured, "it's because you make people talk about you. Wherever you go, and whatever you do, people talk about it. It's being famous and besides, being famous for yourself, not for what you do. And you have such a wonderful round of pleasure."

Yvonne contemplated her cigarette again, following the lazy drifting of its wreath of smoke. "No," she said, "that is not the reason you have been interested in me; and it is not the reason you were so willing to come to me when I invited you." A smile suddenly played at her mouth and she nodded at the girl on the divan beside her. "Is it?" she insisted.

Joanna smiled back at her. "No, I don't think it is, altogether," she agreed brightly, "but that is as close as I can put it into words. You see, all my life, that is, since I've been alone and making my own way, I've had to fight hard to keep up with the crowd. I've wanted things that cost money, and I've wanted things that you can't have, or enjoy, when you're skimped. The things you need to make a show. The best I could ever do was owe somebody installments on a dress or a wrap or my shoes, and keep my eyes open for runs in my stockings. I've looked all right, and I've laughed a lot, but things have always happened to make me cry, too."

Again that bell-like voice of the older girl clipped off a question: "What, for example?"

Joanna studied a moment, her eyes looking out into the room. "They were just such little things," she protested; "things you wouldn't understand."

"I think I would understand," Yvonne persisted.

"But you wouldn't," Joanna argued. "One like you simply would not. I've cried my fool eyes out, often, because some man—some boy I liked, wouldn't stay square. And I've had nobody to talk anything over with. Mostly, people who are worth while to talk to make me feel—I mean, they don't know. When I cut my hair they thought I cut off my morals, and if I go off alone on a party they think I ought to be in a harem. When they tell me I don't act like the girls of yesterday I have to say who cares a hang about yesterday when there's so many to-day and then I'm told I'm just plain bad. Once in a while I get so cut up about it that I have to have a cry." She thought she finished lamely. She smiled a little at the futility of her explanations. But Yvonne displayed no amusement. She said very quietly:

"And don't you think that I am cut up a bit, now and then, when the people who are worth while, as you say of them, interpret me as both plain bad and funny bad? Perhaps I am. There are different ways to view everything, but—well," she broke off, and was silent for a brief moment. "Well, you see that I do understand, after all," she added. And then: "You were glad to come to me because you think I am of today, and not yesterday; that I am the proof of all your little theories of what a woman ought to be today—Isn't that it?"

(To be continued)

Many Homestead Entries

Approximately twice as many homesteads have been taken up in the west this year as last. For the first five months, the figures were 435,520 acres this year, as against 214,408 acres in the same period of 1925.

Cupid is a celebrated matchmaker but sometimes he isn't in a hurry.

A sensible man is one who knows when to let go before taking hold.

CANCER

The potassium treatment, introduced by the late Dr. F. W. Forbes Ross in England in 1912, having been scientifically perfected, has won the lasting gratitude of countless Canadian and American sufferers who have experienced its marvellous success. By combining the two words "Cancer" and "Potassium" this home treatment for all diseases caused by the almost universal potassium starvation is legally protected by patent under the name of

THE CANTASSIUM TREATMENT

Experience of many thousands confirms the great English authority's statement.

"Cancer is a Blood Disease Caused by Potassium Deficiency."

and, if such deficiency is remedied, even for advanced and apparently hopeless cases will retrograde without surgical operation, radium or X-ray tortures and needless expense. Hundreds of thankful letters from restored cancer victims speak of ALLEGEDLY CURED CANCER, which having justified hope to those now stricken by the deadly scourge of civilization.

A deeply interesting book, which will be mailed YOU free of charge, explains THE CAUSE and the most rational method of avoiding Cancer, or treating it where it already exists.

Cancer claimed 150,000 victims on this continent last year.

Cancer strikes rich and poor alike without warning.

Protect yourself and dear ones without delay by sending for this FREE BOOK to

Many Roman Relics Found

Iron Stylus Buried 1,800 Years Is in Perfect Condition

Many relics of Roman London have been discovered in excavations for building purposes in Miles Lane, near London Bridge.

Although buried for more than 1,800 years, a five-inch long iron stylus was completely free of rust and the writing point and the etching edge were as sharp as they could have been on the last occasion a Roman scribe used the pen on his waxed tablets.

A boxwood hair comb is in such good condition that it has the appearance of being almost newly made. The comb, to which strands of fine black hair were still adhering, measures three and three-quarter inches by three inches, and both the coarse and the fine teeth are as regularly and delicately cut—apparently with a fret-saw—as in a machine-made article today.

Excellent craftsmanship is revealed in the sole of a sandal—wood attached to leather and studded with hobnails similar to those used at the present time. The wood and the leather were carved to the exact shape of the wearer's toes. The upper portion of another sandal, although of very thick leather, as if intended for the hardest wear, is of an elegant pattern.

A large quantity of Samian ware (50 to 100 A.D.) has been removed, also a portion of a pipeclay statuette, probably of Venus, of the kind used by the Romans for household ornament.

It was on this site that a portion of a wall of thick timber proved to be part of the river fringe during the Roman occupation, was discovered, and precautions are being taken for the safe uncovering of the continuation of the structure.

Would Not Utter Swear Word

London Actress Is Rewarded With a Shower of Bouquets

The use of a word with four letters meaning an extremely hot place, described in the Bible, was considered so indecent by May Moore Duprez at the opening of a new revue in London, that she declined to utter it.

"You go to —" was the line she was to have spoken, but when the time came she merely said in a weak voice:

"You may go to wherever you like."

The press agents of the show had, by their machinations, worked the audience up to a state of expectancy for the climax of the brilliant actress, who had declared previously that she would not utter the word and there was much joy among them when an ovation was given Miss Duprez and she was showered with bouquets.

Vancouver Grain Port

Vancouver in the last twelve months exported wheat to Britain amounting to total of 31,611,000 bushels, so that of the total of 56,106,715 bushels going to Britain from Canadian ports, Vancouver had approximately 56 per cent. Of the 123,000,000 bushels of Canadian wheat shipped from Canadian ports to countries exclusive of the United States, Vancouver last year handled 52,000,000 bushels.

An unprofitable apartment house is a flat failure.

Minard's Liniment for toothache

Canadian Industrial Development

Assisting Manufacturers and Others in Locating New Materials

In pursuance of its work of advancing Canadian industrial development through the further use of Canadian resources, of advertising opportunities for investment of capital in prospecting, mining and recovering the wide variety of economic minerals both metallic and non-metallic found in the Dominion, of assisting manufacturers and others in locating raw materials for their products, the development branch of the Canadian Pacific Railway Company's department of colonization and development publishes a very complete set of the synopses or leaflets descriptive of these resources located along its lines. The revised issue giving all the latest information available to the end of 1925 has just been distributed to the permanent mailing list.

The set comprises 57 leaflets each containing from two to six pages. They cover all the important minerals and resources of the Dominion, including the forestry situation. Over 300 complete sets and a large number of individual copies of the latest revision have just been mailed from the Montreal office of the company's development branch. The writer or compiler of each synopsis is a man selected for his outstanding knowledge of the subject dealt with. Figures and statistics are the latest procurable from the Dominion Government bureau of statistics and other authentic sources. Each subject is treated as fully as consistent with a concise, summarized presentation of the facts in the briefest possible form.

That business men, financial houses, mining interests, educational establishments and others find these publications of value is evidenced by the fact that in the two years since the first distribution was made, over 77,000 copies have been furnished on request, and the demand is increasing. Apparently they fill the requirement of a brief survey of each situation from which the business man can obtain the salient facts he requires on the special subject of interest without search of voluminous reports or reference to books covering a variety of other irrelevant subjects.

Lost Two Hundred Years

Oldest Gate in England Restored to Oxford College

Balliol College, Oxford, has found a gate belonging to the college which was lost 200 years ago. The gate is probably the oldest in England, having been built for Balliol in 1285, according to the purchase record in the college books. For 500 years generations of related students kicked the gate's timbers to get in after hours. Late in the eighteenth century the gate was missing after the quadrangle was remodeled. It now has been discovered, its oak panels well preserved under a hundred coats of paint, and has been repurchased by a group of graduates and given to the college.

The Oil of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

The Wrong Method

"Tommy," said his mother, "grandmother is very ill. Can't you go in and cheer her up?"

"Yes'm," said Tommy, as he went into the sick room. But in a few moments he came out disconsolate. "Couldn't, mother," he said. "She seemed to get worse."

"What did you say, dear?" asked mother.

"Why, I asked her if she would like soldiers at her funeral."

Little Helps For This Week

One only is the law-giver and judge, even He who is able to save and to destroy; but who art thou that judgest thy neighbor?—James iv., 12 (R.V.).

Thou alone keepest judgment for Thine own; Only unto Thee is known.

What to pity, what to blame; How the fierce temptation came; What is honor, what is shame.

—Alice Carey.

God sees us altogether, not in separate feelings or actions as our fellow-men see us. We are always doing each other injustice, because we only hear separate feelings or actions; we don't see each other's whole nature.—George Eliot.

No man can justly censure or condemn another because, indeed, no man truly knows another.—Sir Thomas Browne.

Corns are painful growths. Holloway's Corn Remover will remove them.

Woman Wins Air Race

Succeeds Easily at Pageant Held by Yorkshire Aeroplane Club

Mrs. Sophie Elliott Lyon, Britain's pioneer woman aviator, has won her first air race. Against a field of seven men fliers, including Sir John Rhodes, in a race of private aeroplane owners at the air pageant held by the Yorkshire Aeroplane Club, Mrs. Lyon won easily. Encouraged by her success, Mrs. Lyon may enter next season for the King's cup race around England which is the big aeroplane event of the year.

Minard's Liniment for bruises

A gymnasium has been installed in passenger cars on a transcontinental railroad. Probably for the use of those who want to train to put up a window.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much 'good' you medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."

Mrs. OLIVER MENARD, 54 Center St., Chatham, Ontario.

CHILDREN CRY FOR

**Fletcher's
CASTORIA**

MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Town of Raymond By-Law No.

A By-Law of the Town of Raymond to regulate the health and cleanliness of the Town pursuant to the provisions of the Public Health Act of Alberta.

3. There shall be a Health Inspector appointed by the Council of the Town whose duties shall be as follows:

(a) To vigilantly supervise or cause to be supervised all streets, lanes, by-ways, lots or premises in the Town upon which any accumulation or deposit of anything which may endanger the public health or upon which any manure or other animal or vegetable matter or filth may be found and at once notify the parties who own or occupy such premises to cleanse the same and remove what is offensive thereon and to see that the provisions of the Public Health Act and of this By-Law are carried out in relation thereto.

(b) To inspect or cause to be inspected all bake shops, butcher shops, slaughter houses, dairies and all premises used in connection therewith, fruit stores, restaurants and all other premises from which food is supplied to residents of the Town at least once a week during the months from May to October inclusive and from time to time to report to the Health Officer the results of such inspection and to see to the enforcement of the Public Health Act and this By-Law in relation thereto.

9. No meat, breadstuffs, cake, pastry, fruit, fish, candy, confectionery or any other article whatsoever, whether solid or liquid, intended as food for man, shall be kept, sold or offered for sale outside of any store, shop or building, or in the open doorway or windows thereof, or in any street or public place, unless such article of food shall be kept properly covered so that it shall be protected from dust, dirt and flies, and all vehicles used for the delivery or conveying of any article intended as food for man, shall be kept clean, and all such food shall be properly protected by suitable covering from flies, dust or other contamination.

13. No person shall permit or allow any dog to enter or be in any shop, store, restaurant or other building within the Town of Raymond, in which any articles whatsoever intended as food for man are sold or offered for sale.

17. No person shall personally or by an agent throw, place, deposit or leave in any street, highway, lane, alley, public place or square, any animal or vegetable substance, dead animals, fish, shells, shavings, dirt, rubbish, excrement, filth, ashes, cinders, soot, offal, garbage or any other article or substance whatsoever. In any alley or lane where any substance above mentioned shall exist or has been deposited it shall be the duty of any owner or occupant of any lot or premises adjoining the same within 24 hours after having been notified by the Health Inspector so to do to remove from the half of said alley or land adjoining such lot or premises all such substances and in default of his so doing he shall be guilty of an infraction of this By-Law.

21. No butcher, meat packer, livery stable keeper, restaurant keeper, hotel keeper or other person shall discharge out of or permit to flow from his shop,

stable, restaurant, hotel or other place any foul or nauseous liquors, slops or substances whatever, into any private ground or into any street, lane or public place within the Town.

22. No person shall erect, maintain or keep any pig-sty or pig-yard within the Town of Raymond without first obtaining the written permission of the Local Board, which permission may be withheld in the discretion of the Local Board.

(b) Every pig-sty or pig-yard for which a permit has been granted as herein provided shall be kept clean and sanitary at all times and so that no nauseous or offensive odors shall be emitted therefrom, and so as not to become a nuisance to neighboring dwellings.

(c) The Local Board may cancel such permit at any time on being satisfied that such pig-sty is not kept in a clean and sanitary condition.

21. No person shall construct a drain from any basement or else where from his premises without first getting permission in writing from the Council. Such permission shall not relieve the applicant from full responsibility for any claim for damages which may arise as a result of the construction of such a drain.

CESSE-POOLS

No person shall construct any cess-pool within the limits of the Town without first obtaining permission from the Local Board of Health.

25. No cess-pool within the Town shall be permitted to overflow but shall be kept so that the contents thereof shall not at any time be within a distance of two feet of the top covering thereof and every owner or occupier of any premises within the Town who shall permit or allow the con-

Wherever motor cars are used, the Ford is known and respected. Adaptability has carried it to the corners of the earth and placed it in every conceivable branch of transportation. Performance has made it the natural choice of over twelve million users.

The light delivery car offers the speed and flexibility of the standard car chassis adapted to package delivery. It is widely used for retail deliveries of every kind operating with ease and economy under the hardest usage. Its dependability emphasizes the Ford quality tradition.
